

CRITERIA/GUIDELINES

THINGS TO CONSIDER

- Grant request should comply with East Rochester Alumni Foundation Goals.
- Grant request should support East Rochester School District Goals/Standards.
- Request should be for funds not covered in East Rochester School District budget.
- All applications will be evaluated based upon the impact on students. All grants will be expected to have as a goal improvement of student character, motivation, or achievement.
- If technical equipment is requested, it must be compatible with our district information technology systems.
- Grant proposals will be evaluated on the basis of potential impact.
- Grant proposals may include those which would benefit students with unmet needs.
- The Foundation will look favorably on new and creative programs.
- The Foundation will consider pilot programs, but may not favor programs which require multi-year funding. If a program is ongoing, the application should address this concern, such as suggesting sources of future funding or monies from other sources.
- Consideration will be given to projects which could be used in the future on an ongoing basis, without additional funding from the Foundation.
- The Foundation will evaluate the success of each project, and request that grant recipients perform a self-evaluation. Please consider ways in which we may evaluate the success of your project and how you will know your goals have been met.
