

IMPORTANT TRAFFIC LOOP INFORMATION

The village of East Rochester will continue to provide a traffic-control officer to manage the intersection of Woodbine Avenue and Garfield Street. This officer and other traffic-control personnel, all of whom will be clearly identified, will be present to help motorists during arrival and dismissal times.

As always, we ask that **all** users of the traffic loop follow **all** the safety procedures listed below:

1. Please drive slowly and carefully when approaching the school, and while in the loop.
2. Please drop off and pick up passengers **on the right side of the loop**. Drop-off and pick-up areas are clearly marked. **Please pull up to the curb** when dropping off and picking up passengers.
3. Please **don't park anywhere in the loop**. Standing areas are clearly marked. **Cars in standing zones must be occupied by the driver**. Parents or other child caretakers who'd like to walk a student to the door **must park in the lower lot** and walk on the sidewalk to the school.
4. The visitors' parking lot is closed during drop-off and pick-up times.
5. Please let children cross the street **only where there are crosswalks**.
6. Please remember **the traffic loop is a fire lane** and must be accessible to emergency vehicles.
7. Remember that according to NYS law, **all vehicles must stop when a school bus has its blinking red lights on**, whether it's in the loop or in the road.
8. There's a tendency for some drivers to enter or exit the loop too fast. Please drive slowly and cautiously while in the loop, and **use special care when leaving the loop area and approaching the intersection**. That area can be very slippery during bad weather.

Thank you for your understanding and full cooperation!
